

# Fairing Green

**client:** Fair Community Housing Services

**budget:** £165,000

**location:** Southwark

**status:** completed

- Fair Community Housing Services, came up with the idea to combine two under valued and under used spaces into one cohesive, attractive piazza and communal garden in a conservation area behind the five-storey blocks of flats that front onto Tooley Street
- Farrer Huxley Associates were commissioned to realise this vision. Working closely with residents, they rapidly developed ideas, agreed a design responsive to residents wishes and administered all aspects of construction, successfully carried out by 'Acer Landscapes' to completion in time for all to enjoy in the summer
- The imaginative design has converted this 'sea of tarmac' into a pleasant piazza for sitting out and community events
- The project was granted third place in the National Federation of Tenant Management Organisations 'In-Touch Awards' for its value in Community Empowerment and Communication, and also received an acknowledgement of best practise in communicating with tenants
